SUMMARY

I'm a Full Stack Developer, experienced with MERN stack (MongoDB, Express.js, React, and Node.js). My current work involves leveraging AWS, GCP and DevOps practices to enhance deployment and operational efficiency. As a freelancer on Fiverr, I have honed my skills through a variety of projects, demonstrating adaptability and proficiency in diverse technical challenges. Passionate about learning new technologies and staying updated with industry trends.

EXPERIENCE

L&T Technology Services | Jan 2024 - Mar 2024

Software Developer Intern

I've worked on React.js, microservices architecture, integrating AI functionality into applications and containerizing AI services using Docker, along with creating Kafka clusters for data pipelining.

Fiverr | Sep 2022 - Present

Full Stack Freelancer

With a proven track record of delivering outstanding results through the successful completion of over 70 orders for satisfied clients on Fiverr. Worked in MERN stack and AWS.

PROJECTS

Holiday Joy | MERN

- A user-focused platform connecting property owners with travellers for listing and booking homestays, resorts, and vacation rentals. Built using the MERN stack with AWS S3 for secure file storage and CloudFront for optimized content delivery. Visit www.holidayjoy.com

AI MUSIC GENERATOR

- This application enables the user to create music using Generative AI. Tech stack: MERN stack, FastAPI, Docker, and AWS S3 for storage.

AWS IAM AUTOMATION WITH TERRAFORM

- Automate the creation of IAM users, assign appropriate policies and roles, and email the user's password.

CI/CD PIPELINE WITH JENKINS

- This pipeline will build, test and deploy containerized Node.js application to AWS EKS.

EDUCATION

BE. Computer Science And Engineering | 2021 - 2025

Sri Ramakrishna Engineering College (CGPA 7.9)

Higher Secondary | 2019 - 2021

Vijayalakshmi Matric Hr.Sec School
